A Preacher on Justice and the Governor.

Following is an extract from the sermon of Rev. I. S. McElroy delivered at the Stanford Presbyterian church last Sunday night. Text, Jonah 1:1-16.

Jonah told these sailors plainly that they must cast him into the sea or the ship could not be saved, nevertheless the men rowed hard to bring it to land. In doing this they seem to have acted nobly, and have been praised by many whereas they deserve to be censured severely, for they acted most wickedly. They deserve praise for shrinking from shedding the blood of a fellow man without divine warrant, but they deserve the severest censure for positively refusing to execute God's sentence against a clearly condemned criminal. They acted the wicked part that is played by so many so-called Christian juries in our own land who refuse to execute the law of God incorporated in our national constitution, revealed to Noah immediately after the flood, and repeated all through the ages, that "whoever sheds the blood of man, by man shall his blood be shed." (Gen. 9:6) For the blood of man defiled the land, and the land cannot be cleansed but by the blood of man that shed it. (Num. 35:33. Jonah was not guilty of murder, but he was guilty of a great sin, and as the prophet of God he declared God's judgment of his case, so that these mariners in refusing to execute that sentence did just what those juries do, who refuse to execute God's sentence against the murderer, robbing justice of her pay and leaving the land defiled with blood. In the name of pity these sailors were enacting a great cruelty to all on shipboard, endangering the lives of the entire crew, just as men in many places are now shielding crime at the expense of virtue, and practicing cruelty upon the community and Commonwealth, under the influence of a sickly sentimentalism falsely called mercy. It is not mercy nor pity that shields the murderer, but a shameful weakness and moral cowardice, shirking a painful duty at the expense of public peace and virtue. God says the murderer must be executed; that the land cannot be cleansed of his crime but by his blood, and we bring God's curse upon ourselves, when we refuse to execute that law by turning the criminals loose to endanger the lives of good and useful men or shutting them up in prison to be pardoned by the Governor after a few years of confinement. And yet our Commonwealth has enacted a law that is in direct defiance of this law of God, encouraging this cowardly spirit that prevails already to an alarming extent, and thrusting an open insult into the face of Him who rules over nations and visiteth kingdoms with his curse. I refer to that statute which makes imprisonment for life a substitute for capital punishment. If the criminal deserves only to be imprisoned for life he should not be punished more than this, but if he is clearly guilty of murder, God says he must be executed or he will hold the Commonwealth responsible for his crime, and he will ultimately visit it with his curse. The curse has begun to work in our land, and the lesson is not yet learned that a nation that does not learn from the example of the great Father of all who pities, from the very depths of his great heart of love, pities the wicked while he visits him with his proper punishment. We need to learn this lesson of pitying and yet punishing. If those sailors had not obeyed God's voice and cast Jonah into the sea their ship would have sunk, and if we do not obey God's voice and execute his law against murder, our ship of state will sink in a sea of crime and anarchy, of anarchy and mob law, of crime and anarchy and mob law. There are those who do not believe these things any more than those heathen sailors believed Jonah, but like them we will learn at last that God's law even though it seems harsh and grates upon our sentimentalism is the only way of safety, of peace and prosperity. And my prayer is that those whose hands are on the helm of state may learn this lesson ere it be too late.

A gentleman, accompanied by a favorite dog, visited the studio of a rising artist. There was a picture on the easel, and the dog began to bark furiously at it. "Nature may be relied upon, after all," said the gentleman. "The best evidence of the faithfulness with which you have painted that dog in the background is the earnestness with which my dog barks at him." "But that isn't a dog," said the artist, flushing. "It's a cow." The gentleman was nonplussed for a moment, but he quickly replied: "Well, the dog's eyes are better than mine; he never did like cows."

"Many cases of fever and ague, dumb ague and congestive chills, were promptly arrested and entirely cured by the use of your Sanguiferin Liver Regulator. You don't say half enough in regard to the efficacy of your valuable medicine in cases of ague, intermittent fever, etc. Every case has been arrested immediately. Believe me, when I say I was a sufferer for years with the liver disease, and only found relief by using your medicine." Robert J. Weeks, Haxley, Kane Co., Ill.

Retained Editors

The retaining of a leader-writer on a great London journal, such as the Times, the Telegraph or the News, is a peculiar feature in English journalism. If a writer shows marked evidence of merit, or if he has the ability to write extensively and in a graphic manner on some special class of subjects, he is retained, as it is termed; that is, he is paid a stipulated amount each year. With the papers referred to, this is commonly £1,000 (\$5,000.)

In receiving a retainer he binds himself not to write for any other publication on the topics for the treatment of which his employer has engaged him. In his leisure hours he can write on other subjects as much as he pleases, but the implied understanding is that he must keep himself thoroughly informed on every phase of the particular question the Times or the News wishes him to write upon, and must be in readiness whenever called upon to furnish an editorial leader.

It may happen that weeks and even months will pass by and no call will be made for his service and at another time his pen will every day be in demand. His retainer is not given to pay him for what he writes, but simply to reward him for keeping himself thoroughly informed, and to secure, when needed, the command of his services.

For the actual writing he does for the paper to which he is attached he receives additional pay.

The London Times pays for its first or leading editorial article \$50, and \$25 each for the following articles. In the Times office it is sometimes the case, on an important subject, that two, and even three leader writers are asked to cover the same ground, and it has frequently happened that the article which appears, is formed out of the contributions of all these, skillfully dovetailed together by the revising editor, who has selected the best and most striking portions of each article submitted to him.

When this is done each writer is paid precisely as though his leader had been printed in its entirety. Hence the cost of some of the Times' leading editorials is \$150. In the other large newspapers the writer of the leading article commonly receives \$25, and the writer of following ones \$15 each. These rates, it may be added, are in excess of what is paid for editorial work by our American journals. [Boston Herald.]

Heating by Sunshine.

Professor E. S. Morse, of the Essex Institute, has devised an ingenious arrangement for utilizing the heat of the sun's rays in warming our houses. His invention consists of a surface of blackened slate under glass fixed to the sunny side or sides of a house, with vents in the walls so arranged that the cold air of a room is let out at the bottom of the slate, and forced in again at the top by the ascending heated column between the slate and the glass. The outdoor air can be admitted, also, if desirable. The thing is so simple and apparently self-evident that one only wonders that it has not always been in use. Its entire practicalness is demonstrated in the heating of the professor's study in his cottage at Salem. The value of the improvement for daily warming buildings like churches and school houses, which, when allowed to get cold between using, consume immense quantities of heat before they are fairly warmed again, is evident. Of course some other means of heating must be available when the sun does not shine. But in the colder regions, say in the far Northwest, the sun shines a greater part of the time, and hence the saving of artificial heat would be very large if the sun heat could be "turned on" for eight or ten hours out of the twenty-four. [Scientific American.]

The Old National Pike.

When General Jackson, in 1829, journeyed from Nashville to Washington to take his seat as President of the United States he traveled by stage coach over the old national pike that led over the Alleghenies. In the palmy days of coaching no post road in the country did so large a business as this splendid old highway, which opened the West and Southwest to the East. The wagons were so numerous that the leaders of one team had their noses in the trough at the end of the next wagon ahead of them; and the coaches, drawn by four and six horses, dashed along at a rate which would have made an English coachman of the day mad with envy. Besides the coaches and wagons, there were gentlemen traveling singly on horseback, with all the accoutrements of their journey packed in saddle bags, and there were immense droves of sheep and herds of cattle raising clouds of dust along their path.

The will of the late John T. Pentland, a wealthy California pioneer, contains the following: "I wish it understood that I am in my clear, level headed sense and know what I am about, and I don't want any one here lawyer business fooling around me." Speaking of his half brothers and sisters he says: "There was a chain running life; let it be even wider in death. This deathbed repentance and pardoning of old wrongs is all in your eye and worse than hypocrisy. I don't want any minister or preacher of any kind at my funeral. The Masons shall do the entire work. Gospel sharp and I never flocked together thickly."

Milk as Medicine.

Gen. Robert C. Schenck, ex-Minister to England, instead of being very decrepit, as has been represented in newspapers, appears to be in good physical condition. He stated to your correspondent that he had been given up some months ago as incurable with Bright's disease of the kidneys, when his physician told him to use skimmied milk as his only diet. He says: "I tackled the skimmied milk, stuck to it, and here I am almost a new man. I believe that skimmied milk is a specific for Bright's disease." As to the use of milk plain, or unskimmied, in the treatment of typhoid fever and other fevers and of the treatment of typhoid with butter-milk, successfully, the writer had heard before. Surgeon General Barnes, about three years ago, heard of an old allopathic physician in Virginia, who, it was alleged, never failed to cure typhoid fever. As there were many patients in the United States Army dying with that disease, Gen. Barnes concluded to visit the ancient Virginia doctor and learn how he treated his typhoid patients. When he met the old gentleman, Gen. Barnes inquired: "What is the mode of treatment by which you succeed?" "Why," replied the venerable physician, "it's the simplest thing in the world; all you've got to do is to get the patient's stomach and bowels in good order, and then fill them up with buttermilk, and keep their stomachs filled with that alone. That's all. I never lose a patient if he isn't already in a collapsed condition when I get to him."

Surgeon General Barnes tells your informant that he adopted your buttermilk treatment among the soldiers in the army, and has found it most efficacious. It appears that some ten years ago the medical scientists of France and Russia compared notes as to the use of plain sweet milk in the treatment of their typhoid patients, and concurred in the statement that milk not only is of wonderful efficacy in typhoid cases, but in the treatment of fevers generally. [Courier Journal.]

In a Pinch of Plight.

The recent exhibition of what used to be called chivalry by Congressman Blackburn, of Kentucky, places him in a pinching light before the country. He has succeeded in getting himself advertised in such a way that does not commend him to men of sense any where. It is difficult to understand what feeling a man gratifies in himself by undertaking the role of Bombastes Furioso. There was a time when bluster counted for something, because it was generally backed up by a fight. But no body expects controversies like that which has recently taken place between Mr. Blackburn and Senator Williams to result in a personal encounter, and therefore it earns for a man the ridicule and contempt of the world. It is to be regretted, that a man of Mr. Blackburn's ability and force should so far forget his personal dignity as to indulge in so silly a parade of personal courage. [Evansville Courier.]

A Modest Candidate.

The writer, Sam Morton, is a candidate for the Legislature. I do not want to be elected so much for the good I can do the country, but for the good the country can do for me. My opponents are all clever men. So am I. I think a great deal of them, but not so much as I do of myself. My opponents are all men of means, for I heard a man say that one of them was the meanest man in the country. Consequently they are able to get beat, and then have something to fall back on, while I have nothing but my good name. Now, gentlemen, voters of Miller, elect me, and let my only son proudly boast that his old daddy is a representative of the pious old county of Miller. You will hear from me again on this subject. For the present, in conclusion, will say to my friends in Miller, vote for Morton and save your country. [Colquhoun Cor. Early County (Ga.) News.]

In the tenth scene of *Romeo and Juliet*, at Haverly's Brooklyn Theater, last Monday night, Lillian O'Neil, the new "Juliet," exclaimed: "O, my happy dagger," but there was no such weapon in view. Dropping on her knees, she whispered into the dead "Romeo's" ear, "Where is it?" but "Romeo's" head indicated his ignorance of its whereabouts, so the gentle "Juliet" stabbed herself with her forfinger and forth mortally wounded on the prostate form of her lover, while the audience mournfully dispersed.

Men may create philosophies; they may turn the Gospel itself into a cold abstraction, but the practical truth remains that the Christ who saves, comforts and lifts the intolerable burden of sorrow or of sin, comes now as of old--comes as a living, loving, personal presence, human in sympathy, divine in power. Our need and our consciousness of it form our strongest claim upon Him and the best preparation for Him.

In a Western city a new hotel was recently opened. The bar-room was gorgeous in bar-room magnificence, and when it was completed the privilege of taking the first drink was deemed so desirable that twenty dollars were offered and paid for it.

When reproached by his employer for absenting himself from the office for two entire days, Fogg very calmly replied that he believed in the office seeking the man, and not the man seeking the office.

"Hardening" the Body.

A young man was an earnest advocate of a theory that the human body can accommodate itself to any temperature in which it may be placed. One winter he determined to harden himself by wearing no covering for his ears; they were badly frozen on a very cold day, and were tender for several years after. He grew weak, and abandoned the hardening process. A young woman heard an eloquent lecture on the importance of fresh air in chambers at night. The lecturer said there was no danger from a window slightly opened; the body would soon harden itself so as to resist the effect of the exposure. She tried the experiment one cold night and caught a cold, which lasted the entire winter. She lost faith in hardening against cold. A young mother maintained that children ought not to be brought up too tenderly. Arms and legs ought to be hardened in early years, and not be made tender by warm coverings in winter. She lost her two children by croup and pneumonia, induced, as the physician said, by insufficient clothing. She gave up the attempt to harden the others.

The best way to harden the body is to protect it well from extremes both of cold and heat, and build up a strong constitution by good food, good sleep and good exercise. The Scotch Highlanders, with their bare legs, are victims to rheumatism.

When We Were Young.

Then the Summer mornings were full of singing birds, always waiting outside our windows to help us begin the day with happiness. Then flowers were born as it to accompany the birds in their benevolent mission. Then all our dreams were pleasant imaginings, Arabian Nights' entertainments, frolic visions of untroubled joy. Then June was the longest and loveliest month in the calendar. Then we were never depressed by bad weather. Then headache had no lodgement nearer than our neighbor's brain. Then personal rheumatism was unknown to us. Then insomnia had not been invented, and we were not obliged to draw upon the apothecary for viols of sleep. Then we could walk twenty miles a day without fatigue. Then all was gold that glistened. Then we were young. [Harper's Magazine.]

BOOKS IN HIS OWN HOUSE.—He walked out of the front door, followed by a wash-board and two bars of soap, and, as he straightened himself and walked firmly down the street, he remarked "A man must draw a line some where, or he can't be boss of the house; and I'll be hung if I'll pump more than one tub of water for no washing, and there ain't a woman can make me do it unless she locks me in."

A very wicked Western scribe does this: "In his lecture in New York last week Oscar Wilde said: 'When I was in Leadville and reflected that all the shining silver I saw coming from the mines would be made into ugly dollars it made me sad.' When a Chicago man looked at an ugly silver dollar and reflected that his wife was going to give it up for a ticket to Oscar's lecture it made him sad."

TRANSLATION FROM THE OMNIBUS. "Pretty wife kin," said Herr A. to his young neighbors, "give me yeh a kisslet. I ask only curiosity out of, because I gladly know would whether it from your mouth sweeter tastes than that of my frau." "Ask you only my husband, he has your dear frau many a kiss given, he must it know." [Nelson Record.]

Bishop Payne is 90. In asking the Methodist Conference at Nashville to relieve him from further active service, he declared that sixty-five years of ministry had not shaken his perfect belief in the truthfulness of the Christian doctrine of salvation. The modern forms of scientific skepticism had not raised the shadow of a doubt in his mind.

BIG FIGURES.—In rolling-mills at Pittsburg there is a cash capital invested of \$19,020,000, with a product amounting to \$30,242,257. There are 18,905 hands employed in these mills. In blast furnaces and other manufacturing of iron there is a capital of \$5,157,000, a product of \$9,286,492, and 2,511 hands employed.

SINCE the Court in banc has decided adversely in the Gutierrez case, his counsel is preparing for another effort in his behalf and will either try the habeas corpus dodge or demand a trial for lunacy. Meanwhile the prisoner is calm and serene, with not a thought that his neck will be stretched on the 30th June. He says the nation dare not permit his "removal" for God will smite it with an everlasting curse, if it does. But fifty millions of people believe otherwise and are willing to run the risk of a curse to get rid of the one that at present afflicts them.

THE prosecution has rested in the Malley trial for seducing and murdering pretty Jennie Cramer, and the defense is now at work to save the necks of their clients. It is likely that it will succeed since a not very plain case was made out against them. That the poor girl was cruelly wronged and then poisoned to keep her from talking, and by James Malley, is generally believed to be true, but the evidence is just about circumstantial enough to hang the jury and turn the fiend loose to again prey on female virtue.

THURSDAY has been a dead lock in the House for three days over the Mackey-O'Connor contest. The democrats claim that Mackey's claim is based on forgery, which the republicans are unwilling to investigate. They wish to send him whether or no but the minority is doing its best to prevent the outrage. The democrats are ready to consider the appropriation bills and other public business, but will not consent to try this case until after a full investigation of the forgery.

THE Post Master General is a man after our own heart. He recommends to Congress "that postage on second-class matter (papers and magazines) be abolished. He states that fourth-class matter (merchandise) is carried at a loss to the Government, and if the Government is to be taxed for the transportation of either class, it should be for second-class." You are mighty right, brother Timothy. How sensible you are!

THE Independent Republicans of Pennsylvania, held a Convention Wednesday, and nominated Senator Stewart for Governor, L. B. Duff, for Lt. Governor, and a full State ticket. NOTES OF CURRENT EVENTS.

—The Kentucky Central now runs regular passenger trains on Sunday.

—Judge Phister, of Mayesville, Ky., declines a re-nomination for Congress.

—Senator Logan wants the Government to establish a hospital at Mt. Vernon.

—Six men were killed in a Schuykill coal mine Wednesday by a gas explosion.

—A. W. Huggins, coroner of Jessamine, is in the Lexington jail for forging his father-in-law's name.

—The frost of Monday night did great damage in Indiana, Illinois, Iowa and other Northwestern States.

—The Greenback National Committee, represented by 14 members and 28 proxies, was in session at St. Louis.

—Jan. Brady has given bail under the new indictment on the Star-route charges, making the amount now \$50,000.

—Reports regarding the wheat crop in Missouri indicate that never before were prospects so promising at this season.

—Five men who attempted to fire a Mexican railroad bridge, were captured and immediately shot, by order of the Governor.

—The Governor of Tennessee has signed the bill to fund the State debt at sixty cents, with interest at three, four, five and six per cent.

—The grand chorus of the Chicago Festival comprised 800 singers. There are 280 sopranos, 235 contraltos, 195 tenors and 180 baritone.

—The amount of fire risks taken in this country last year by all companies was \$3,582,021,754, an increase of \$750,000,000 over the year before.

—Mrs. Burnett, the dwarf, who survived the Cretan operation, is now on exhibition with her child at one of the cheap museums in Philadelphia.

—In a partition sale of the Bennett estate, in New York City, James Gordon Bennett bought in all the property, the amount realized being \$1,361,000.

—Two negroes fought on a bridge over Hinkston's Creek in Bourbon county, when they clinched and falling 25 feet into the stream in each other's embrace were drowned.

—Senator Ben. Hill, now at Eureka Springs, Arkansas, is reported as much improved in health. His physicians say there is strong hope of a cure, and his life will certainly be greatly prolonged.

—The Geneva Award bill passed the Senate. Briefly stated the bill makes provision for the claims of the exculpated consular class and war premium men to the exclusion of the insurance companies.

—The Louisville Post has won its suit against the Courier-Journal for publishing extra editions during the excitement of Garfield's illness, and using dispatches, which, according to contract, was the sole property during the day of the former paper.

—A bale of cotton sold for the benefit of the Mississippi Valley flood sufferers, brought 60 cents a pound in Cincinnati, 81 cents in Louisville, and has been shipped to New York, the Adams Express taking it free of charge. It has already realized \$363.

—In the House of Commons Mr. Gladstone moved the second reading of the Arrangements of Rent bill. It provides that on payment of one year's rent by the tenant all previous arrears will be wiped out. If the bill passes it will be equal to presenting the Irish with fifty million dollars.

—The Court of Appeals has decided when a note is, by an endorsement of the payee, made payable to a bank "for collection," payment by the payor to any person other than the bank or its agents is at the payor's risk, and if payment is made to a fraudulent holder the payor must bear the loss.

—The Supreme Court of Missouri has declared the law making gambling a felony constitutional. The war on gambling in St. Louis now promises to be active. There are over eight hundred cases altogether on the docket against lottery men and gamblers, and the acting Circuit Attorney says that they will be pushed.

—The Atlanta Constitution prints a letter from Hon. Alex. H. Stephens, in which he says he will accept the nomination of the Democrats if tendered, and that the telegram of Hon. Emory Speer, which states that Stephens would accept the nomination of the Independents, was unauthorized. This is taken as an evidence of his want of confidence in the faction making up the independent movement, so called, in his State.

—Judge Matthews, of the United States Supreme Court, has convened the United States Circuit Court in special session at Knoxville to try the case of the State of Tennessee vs. George F. Larkin, for murder. About a year ago Larkin was Deputy United States Marshal and killed his cousin. The case attracts much attention as a test case, because it is the only one of the kind ever tried in the United States Court. Judges Baxter and Key sit with Judge Matthews.

—The annual report of the Board of Trade of Cincinnati, which is about to be issued, will show that there has been an increase of thirteen per cent. in manufactures during the year. The total value of the articles manufactured was \$304,079,947, an increase over the previous year of \$24,728,190. Upwards of five and a quarter million dollars was added to the cash capital invested in manufacturing enterprises, and employment was given to 5,554 more men than the preceding year.

—Sunday morning two young Indianapolis lovers drove out into the country for the purpose of committing suicide. After attending a picnic they sought a secluded place and divided between them a dime's worth of laudanum, and sat down in a fence corner to die. The drug did not have the desired effect. So the next morning they purchased and divided twenty-five cents worth of laudanum. The young man died in the girl's arms, and the latter, leaving the body behind a woodpile, walked into the city.

"PRAISE THE LORD."

LAWRENCEBURG, May 24th, 1892.

Dear Interior:

It is but natural in this waning life of mine, that the first letter from each place should linger lovingly over the warm nest from which we have just fled. I therefore, until the new love takes the place of the old, instinctively turn to Vermales for a few parting words. No "take the place," is hardly a descriptive phrase for that implies that the one supplants the other, which is untrue. Each, in turn, keeps its own niche in the heart, never to be shared by any other, much less supplanted. Only the last, must of necessity engross the attention and concentrate the sympathies, in their living issues. The others are blessed memories, but always with a tinge of something dead and gone to heaven: living it is true, but living out of sight. Not, therefore, "out of mind." A thousand times no! But well remembered, and talked over, yet always as of something we shall know no more of until we reach the Golden City, where all pleasant things will come back as present realities, never again to vanish from sight.

And this brings me to notice the steadily deepening conviction, that when we leave any city or village, we say "good bye" as a finality, for earth, and that before many are in fact, "gone over, the Son of Man will come."

We left dear Versailles and its pleasant people with a lowering sky overhead, a raw wind blowing from the N. W. and the mud and water flying from the carriage wheels as we drove rapidly away. Not with the look of Lot's wife, but still lingeringly, we "looked back." How soon we get to love people in a meeting like the one just closed! In 17 days it was as if we had been "born and brought up" in Versailles. It differs from nearly all the towns in Central Kentucky, in this, that while it has, with a handsome Court-house, one elegant church, and a block of well-built stores, it has a few really homelike private residences, yet these are more old-fashioned, quiet, clean, cozy homes in it than any town I know. "Off the railroad," will in part, account for this, and I confess that I like it, though it may be in bad taste, just as I think Philadelphia is better looking than Chicago, because it is more homelike. What a shame to use this word as a synonym for ugliness! There are few prettier drives than from Versailles to Woodford Landing, or Clifton, on the Kentucky River, where we crossed, at a point about 12 miles above Frankfort. The approach to the river is perhaps the most exquisitely beautiful one of that romantic stream. Another crossing at Tyrone, a few miles higher up, shortens the distance a couple of miles, but is not so attractive a drive.

Anderson is in some parts of the country, rough and poor, but one hardly sees the difference between it and Woodford on the Clifton road. Lawrenceburg itself is in the midst of a beautifully rolling tract, as pretty as a picture, and "rich as a cream." And it is a neat, well built village, with hardly a shabby spot about it. The Court-house, where we hold services, is unique, being built of dressed stone, with two prodigious Corinthian columns in front and iron stairway to the offices in the 3d story. It is in process of repainting, stopped until the meeting is over, and will be very handsome and imposing with its new coat. A four story cupola makes it very conspicuous from a distance.

The new Presbyterian church is an elegant little edifice, the Methodist old and dilapidated, and Reformed, once burnt and once blown down, has externally, that look of a battle scarred veteran that one might expect after such an experience of elemental war. The Baptist have a neat and substantial meeting-house. Our old friend, Charley Williams, formerly of Danville, and a staunch Baptist, met us with a warm welcome as we entered town and were soon in comfortable rooms at the "St. James"—kept by Bro. Head, a Methodist preacher, once in Harrodsburg, and a former acquaintance. Mrs. H. does every thing to make us comfortable and we are delightfully entertained. At the first service Monday night the house was packed, and last night it was jammed. No confessions yet, but close and respectful attention. One lady solicited for healing last night—first fruits of what we fully believe will be a glorious meeting. The "outlook" is very favorable, but we are not looking at anything or anybody but JESUS. He will make us "more than conquerors," I am sure. We like Lawrenceburg, thus far, "ever so much." Yours, in Jesus, GEO. O. BARNES.

—Jack Dunn bought of Matt Hutchinson one milk cow and calf for \$35. He also sold to Matt Hutchinson a three-year-old mare, well broke to harness and saddle for \$85.

—Prospect for crops were never better than at present. Wheat is well headed; hemp is growing finely, and corn and weeds are battling for victory. Jack Frost called last night and over was above par.

—Mrs. Coleman Hicks died on Tuesday last, of Consumption. Mrs. Womer is very low with dropsy. Miss Bettie Doores is recovering. She says so soon as she is able to write she will send an impartial account of her being poisoned to the press.

—The candidates promise us frequent visits in the near future. How strange that they never have time to mix socially around among the farmers only a short time before the election. But here's to the Democratic nominee, and don't forget it.

—Mrs. E. H. Burdette and Mrs. F. P. Owsley, of Stanford, were visiting relatives here Wednesday.

—A special train was run from Richmond, Monday night, bringing about 150 of the elite to the show.

—Gov. McCrory was here all day Monday. He took in the show and returned to Richmond on the special.

—Mrs. A. W. Smith, Miss Minnie Smith, Miss Lucy and Patsy Miller, Miss Robert Harnum, Rest Stockton, Al Curtis, Cooper Huggins and Bell Herndon, composed the Richmond Dramatic Club as it appeared here Monday night.

—Monday was the dullest, wettest, driest, muddest, most unprofitable County Court day ever experienced in Lancaster. A few sheep and very few cattle was all the stock offered and sold at short prices. The Dunlap property sold to W. G. Dunlap, for \$8,000.

—The democratic County Committee has at last decided on a candidate for County Judge in the person of Alex. R. Denny. Mr. Denny is too well known by the readers of this paper, especially in this county which is most interested in the matter to require an introduction. A man of sound sense, the embodiment of honor and possessed of the dignity which should attach to the office, his acceptance of the nomination would almost assure his election.

—The Richmond Dramatic Club appeared here Monday night in a Comedy entitled "Woodcock's Little Giana." The lachrimancy of the weather prevented the turnout of people expected and Lancaster is entitled to a very small credit on the matter to require an introduction. A man of sound sense, the embodiment of honor and possessed of the dignity which should attach to the office, his acceptance of the nomination would almost assure his election.

—On Monday, April 17th, a man calling himself Frank Yewell, and claiming to be a citizen of Kansas, came to Mr. William Hubble's, in Lincoln county, for the avowed purpose of buying a Jack. It was probably late in the afternoon when he got there and he accepted the hospitable proposition of Mr. Hubble to stay all night. During the evening he was engaged in conversation with the three sons of his host, and the talk drifted to the subject of Jesse James' "removal." He was greatly in sympathy with the James boys in all their trouble, and entertained his listeners with minute details of their escapes in several instances, especially of their escape after the Northfield bank robbery, giving several particulars which could have been known by none but the actors themselves, and which in the knowledge of the young men had been published in no newspaper. This, with the fact that this man filled exactly in build, age and feature, a lately published description of Frank James, and the facts that his hair had been dyed, that he limped in his walk and that the first finger of his right hand was off at or near the second joint and which he said had been taken off by a cutting box, a thing almost impossible, as cutting boxes have a preference for the left hand, convinced Spencer Hubble that their guest was no other than the notorious Mr. Frank James. His suspicion was not made known to Frank, who was so much taken with Mr. Yewell that he shared his bed with him that night, but you may bet your last dollar Mr. Y. might freeze before Frank would "open" for him again, unless persuaded by the three improved Smith & Wesson's stock man carried. Tuesday, April 18th, was the day set for Wm. Austin to hang, and had that affair taken place Mr. Yewell (7) or Mr. James (2) intended to witness it, as it did not and he had failed to buy the Jack from Mr. Hubble, he left, saying that night at Mr. Logan Caldwell's, in Boyle county. I understand he has since been in the city of Stanford. Mr. Caldwell says, so I heard, that whether his name was what he said or not, he did not talk like a trader, and he is satisfied that part of him was a sham.

—Marion Sweeney moved last Monday to the property of W. T. Tate's, formerly occupied by Silas Bowman.

—Miss Daisy Rine, the fair correspondent of the Danville Tribune, was in town last Saturday and Sunday. Senator Robert Blain was here last Monday night on his way to Jamestown to attend Court.

—It is now reported that our young friend, Thomas Bowling, is to be married to (we will not give the young lady's name) in a few days. The wedding is to take place in town, perhaps at the church.

—The two Cooley boys who were in jail here for setting the woods on fire on the Rolling Fork, were turned out last Saturday morning. It is reported here that they were convicted and punished in this county for firing the woods in Marion county. They had no counsel to defend them.

—Our Sunday-school was reorganized last Friday night with Elder B. F. Henson as Superintendent and Rev. A. C. Tabor Assistant Superintendent. Quite a number of suitable and energetic teachers were selected, and we now feel assured that the Sunday-school will be the means of bringing many hundred sinners into the church. Rev. Wm. Cloyd filled his pulpit here last Sunday and Sunday night.

—Last Monday was County Court day here. The river was past fording and it rained nearly all day, consequently there was the smallest crowd in town that we have ever seen on such an occasion. Nearly every man we met was a candidate, and there was little else done besides hand-shaking. Geo. A. Prewitt, Master Commissioner, sold 16 acres of land on Frye's Creek, the property of James Howe, to satisfy a judgment in favor of the Aultman-Taylor Company, which brought \$50. He also sold 100 acres of land, the property of O. Portman, to satisfy a judgment in favor of O. Portman's creditors against his administrator, which brought \$50. More drunken men on the streets than usual.

Three Wood machines were sold on the field.

BRUCE, WARREN & CO.

"AN HONEST CONFESSION IS GOOD FOR THE SOUL."

In order to get the extreme low prices and greatest discounts, we have bought a larger quantity of goods this season than ever before, and possibly more goods than this trade demands. We have always advocated that it is better for us, and certainly is for the customer, to sell a great many goods for a little profit than a few goods for a great profit. To enforce this principle, we are ready, with an increase of trade, to reduce our prices, and from to-day will begin a new scale that will astonish the people. Our Grocery and Clothing combination, with the advantage of a Double Store, is working admirably, and we continue to urge all to bring along their produce and exchange for merchandise. We have added to our stock a staple line Dry Goods, which makes it almost impossible for you to call for anything we cannot supply.

Parties desiring to visit our store from Livingston, Pine Hill, Brodhead, Gum Sulphur, Crab Orchard, can now come on the regular train and spend five hours to thoroughly investigate this market and learn the genuineness of our low prices. We are always open for the convenience of the public, and continue to invite all to make our house their headquarters; transact your business; chat your friends; use our chairs, writing material, &c., and we trust that you will feel it is no imposition on us, for we confess the public has traded liberally with us, and we want to show some appreciation of it.

Cato divorced his wife to Hortensius and afterwards married her again. Augustus obliged the husband of Livia to put her away that he might marry her himself. There are historical accounts of women taking their tenth husband. One woman had eight in five years. Cicero cast off Terentia. Maecenas continually discharged his wives. A Roman writer declared, "Divorce is the fruit of marriage." Jerome tells of a wife who was married to her twenty-third husband, she herself being his twenty-first wife.

In China a son must leave his wife if she displeases her parents. Mutual dislike, incompatibility of temper, and "too much talk" on the part of the wife, are common causes of separation. A Japanese wife can get a divorce at any time upon a specified sum.

Some one has defused divorce to be the shadow cast by matrimony. Verily it seems to be a shadow cast by the majority of our modern marriages, and a shadow that is increasing at an appalling rate. Figures furnished by the New England statistics on the subject will suffice.

In 1878 there was one divorce for every fifteen marriages in Massachusetts, one to thirteen in Vermont, one to nine in Rhode Island, and one to eight in Connecticut. In these four states 1,000 persons were yearly divorced, 1,000 families are broken up, throughout the United States marriages are increasing slowly and divorces are multiplying rapidly. In sum, one divorce, all over the Union is estimated at not less than one to every twenty marriages.

Among the thirty-eight States there is little legal uniformity. A modest man married in one State frequently finds that she is not a legal wife in another. A divorce decreed in one State is sometimes set at naught in another. By the present state of affairs, a man may have several lawful wives at once in different sections of the States, and a child may be a law-abiding citizen in one State but illegitimate born in another. It is even recommended for parties meditating matrimony to familiarize themselves with the contradictory State statutes, in order that they may be prepared for whatever may happen."

But why any longer segregate the mother and her child, if it is actually patent that the majority of marriages are ill-assorted unions. People rush into matrimony in a headlong manner. The result is they are taken of one another and try to break the bond. People of proper pride endeavor to make the best of a bad bargain, and feel a delicacy about trading their private grief before the world. Many times a recourse to the law at measures makes much mischief to the parents, and the children and other innocent sufferers which should be avoided. Self control and mutual forbearance will do much to soften the harsh disparities of a repulsive life partnership. Husband and wife may be mutually divorced by mutual incompatibility and yet manage to make

A saving woman at the head of a family is the best savings bank established. The idea of saving is a pleasant one; and if the women imbibed it, they would cultivate and adhere to it and thus when they are the care of it, they would be laying the foundation of a competent security in old age. The best way to comprehend it is to keep an account of all current expenses. Whether five hundred or a thousand dollars are expended monthly, there is a chance to save anything if the effort is made. Let the housewife take the idea and upon it, however, and she will be able to save money, and she will be able to do so.

The lake contains no fish, but immense numbers of gulls, wild ducks, geese, and swans frequent the island shores. The first known mention of the lake was by Barouontan, in 1689, who gathered some vague notions of its existence from the Indians West of the Mississippi. We had heard of this tree in other places, but had never been able to believe the stories of the flexible bending in the breeze, leaving this phenomenon an optical illusion, but such is really the case. To be long, thin leaves of iron, like life to the hairlike fibres of the twigs and branches, wave tremulously in every zephyr, and the whole tree, painted artistically, has so close a resemblance to the real tree as to deceive the nearest observer at the dis-

ding, and is in fair order, only posts having been renewed in 36 re. We have proved on this farm a chestnut posts are more durable and placed directly in the ground.—[Farmer.]
